Status:	Final	Date:	January 2019

Viridis believes that we have a responsibility to care for and protect the environment in which we operate. We are fully committed to improving environmental performance across all of our business activities and will encourage our local and interstate business partners to join us in this effort.

To minimise potential environmental impacts Viridis will strive to:

1. Adopt the highest environmental standards in all areas of operation, meeting and exceeding all relevant legal and other requirements.
2. Assess our organisational activities and identify areas where we can minimise impacts and reduce pollution.
3. Continually improve and broaden the environmental knowledge and expertise of staff.
4. Reduce our environmental footprint through minimising the consumption of resources and adherence to the waste hierarchy.
5. Establish, implement, maintain and continually improve a Quality Management System.
6. Be active in the local community and improve the environment that we live in.
7. Undertake project activities in a manner that minimises adverse environmental impacts.
8. Periodically consider the environmental impact of operations and project activities and identify new opportunities to reduce our environmental footprint.

Signed

James Howey
